⍰ Abstract:

PROBLEM TO BE SOLVED: To provide a method for automatically generating the summary of the subject of a document which can be read by a machine.
SOLUTION: A document including first plural sentences and second plural terms is read by a machine, and a processor executes an instruction stored in an electronic configuration in a memory connected with the processor. The terms in the first number are selected from the second plural terms as the terms of a subject, each sentence of the first plural sentences is scored based on the generation of the terms of the subject in each sentence, and the sentences in the second number are selected from the first plural sentences based on the score of each sentence.
